DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 and 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Regarding claims 2 and 6, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).
4. Regarding claim 2, the phrase "or other type" renders the claim indefinite because the claim includes elements not actually disclosed (those encompassed by "or other type"), thereby rendering the scope of the claim unascertainable.
5. The term "approximately" in claim 6 is a relative term which renders the claim indefinite. The term "approximately" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The surface area increase is rendered indefinite by this term.
6. Regarding claim 7, the phrase "or the like" renders the claim indefinite because the claim includes elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim unascertainable. See MPEP § 2173.05(d).

Art Unit: 3673

7. Claim 8 recites the limitation "the bond" in line 3. There is insufficient antecedent basis for this limitation in the claim.

8. **While not indefinite, it is noted that the language of the claims includes positive recitations to both the cap and the blocks; therefore, the claims have been treated as claiming the combination of the cap and the blocks. If it is applicant's intention to claim only the cap, appropriate amendments to the claims must be made.**

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marble (U.S. Patent 2,016,968) in view of Richter (U.S. Patent 5,857,802). Marble clearly discloses a cap between adjacent blocks (5, 6) and comprising a cap portion (8), a leg portion (9) insertable into fluidized sealant material (7). Marble does not teach the ridges positioned on the underside of the cap portion. Richter teaches using ridges on a cap-pavement connection (Figure 2, for example) in order to improve adhesion therebetween. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the ridges of Richter on the underside of the cap of Marble for this purpose, as is common practice in the art.

Marble teaches lead as a material of construction (column 2, lines 22-24).

Marble includes the pointed end (10).

Art Unit: 3673

Marble positions the seal between horizontal and vertical surfaces (Figure 4).

Marble discloses the method steps.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references teach caps for joints.
